Opium Powdered USP
ITEM CODE  1676

For centuries, OPIUM has been used for the treatment of diarrhea. The most widely prescribed form is camphorated tincture of opium (Paregoric). This drug is universally used for the symptomatic treatment of all types of diarrhea. It has the advantage of being effective and inexpensive.

Mallinckrodt is a major producer of opium for Paregoric products and offers Opium Tincture-2% AMA/15% alcohol (Item Code 4311) and Opium Powdered USP for use in special prescriptions and suppository manufacture.

Common Trade Name: Paregoric
