Detach shipper cap.

Remove anvil and trocar tips.

The white trocar can be removed from anvil by depressing black release button.

Insert anvil.

Tighten pursestring around pursestring notch.

Extend trocar. Orange band must be visible.

Attach anvil to trocar.

Tilt-top anvil must click in its fully seated position and orange band must be completely covered.

Fully tighten with twist knob.

Remove safety.

Handle must be fully squeezed, until it comes in contact with instrument body.

Inspect tissue specimens.

Rotate twist knob two full turns prior to removal from patient.

Safety needs to be reset for proper opening.
